

F-controller

High quality ECU

Part no.: V4F

Our F-series controllers contain the most advanced technology available today. We adopted proven, high-performance components and incorporated unique system solutions into our products. We ensure strict quality control on every stage of production process.

All F-controllers are equipped with powerful microprocessor which supports the built-in automatic correction system. This permits the controller to perfect parameters of the CNG/LPG injection in order to use it in any vehicle.

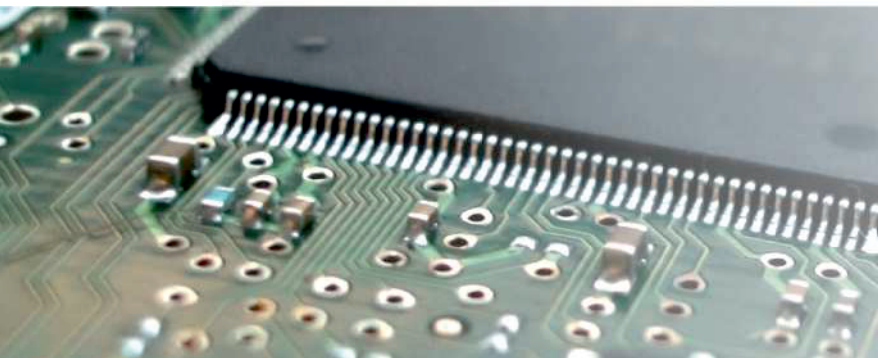

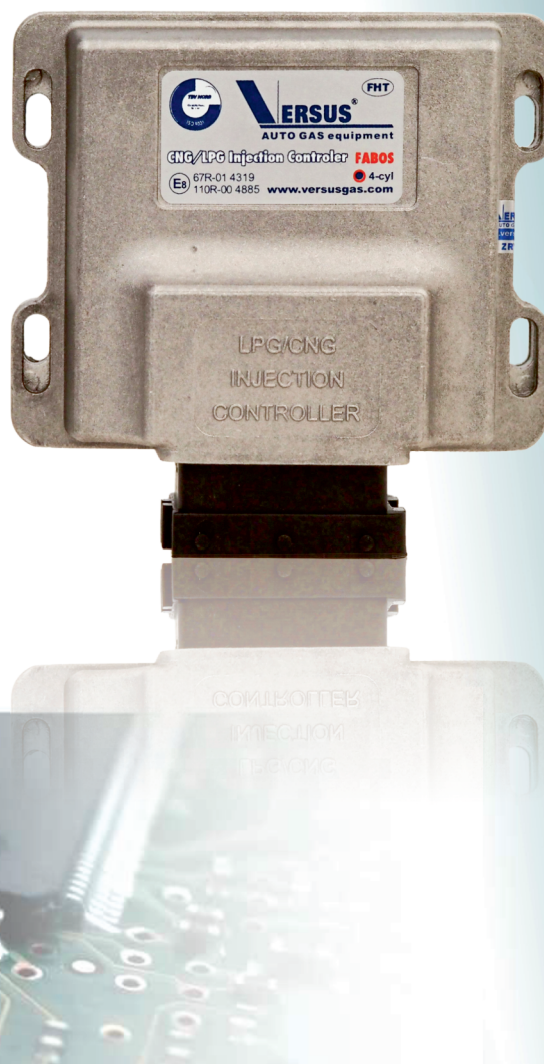

SCS Self-Calibration System

DSP Digital Signal Processing

Main features:

- ARM-cortex
- Aluminum or plastic housing
- Self-Calibration system supports automatic correction adjustments
- Optional OBD during calibration „ELM327”
- Integrated injectors short-circuit protection
- Self-diagnostics and troubleshooting system
- 1x24 PIN connector
- Dimensions: 105 x100 x 35 mm

Available only for 4 cylinder engines
